With over 7 UNESCO Heritage sites to visit, one can end up spending hours in the city. We have put together some of the most spectacular places and most fun things to do for 30 minutes in Delhi! The most popular attractions in the city are listed in alphabetical order. 1. Indian Museum, Lodhi Road Best time to visit: The museum is open on all days from 9.00 am to 6.00 pm. The National Museum of India is located in Delhi at Lodhi Road. It is the country's premier museum and is dedicated to the history, culture, art, architecture and natural history of the Indian subcontinent. It covers over 5 million square feet and includes the art of more than 120 different countries of the world. The museum consists of various parts, the first section exhibits over 8,000 pieces of ancient art from all over the world. It is a great place for visitors to look for ancient artifacts from India. Many of these artifacts are the remnants of the Indus Valley Civilization and the early civilisations of India. Another section is a store where visitors can buy handicrafts from different parts of India. All kinds of Indian handicrafts are available for sale here. Another section of the museum is dedicated to the rich flora and fauna of India. There are around 1500 specimens from the country that have been preserved.

What's New in the?

The drawing tools for creating variable legend markup also support creation of variable characters, and now support importing glyphs from the new Glyphs service (video: 6:41 min.) Mass Retain/Replace: Mass Retain and Mass Replace give you new ways to maintain and update your design as needed. Using the new Retain Values feature, you can more easily correct, refine, or maintain your model and 3D view. And with Mass Replace, you can make even minor changes to a complex model with just a few clicks. (video: 1:25 min.) Save space, avoid data compression: AutoCAD 2023's In-place Data Compression is a convenient way to compress an entire drawing or parts of it. With In-place Data Compression, AutoCAD's data compression feature can compress or decompress any data in the drawing including blocks, tags, layers, and models. (video: 1:09 min.) In-place graphics: More performance and reliability in AutoCAD and other graphic applications when you open a drawing. In this release, we've improved the AutoCAD.NET Framework's performance for dialog boxes, made compatibility with.NET Core, and added API support for new components in.NET Standard 2.0. (video: 3:56 min.) Fast and flexible dimensioning: AutoCAD's new Set Dimension Tool allows you to quickly and easily set dimensions at the same time you set reference lines, centers, or inferences. (video: 1:42 min.) Glyphs: Glyphs allows you to quickly generate and update complex or specialized types of drawings. Now, you can apply your own glyphs to any element in a drawing by adding Glyphs to a view or toolbar, or creating new custom glyphs. (video: 2:12 min.) Image Composition: Make drawing much faster and more reliable. Compositing in AutoCAD gives you the ability to combine two or more images, or use the image on top of another as a background. (video: 1:10 min.) New components in.NET Standard 2.0: Developers can now create and access components in.NET Standard 2.0, which means you can now also use them from Linux, macOS, and Windows. You can easily create
